

CHEMISTRY FOR LIFE AND LIVING

Kevali
Chemicals

What is in a name ?

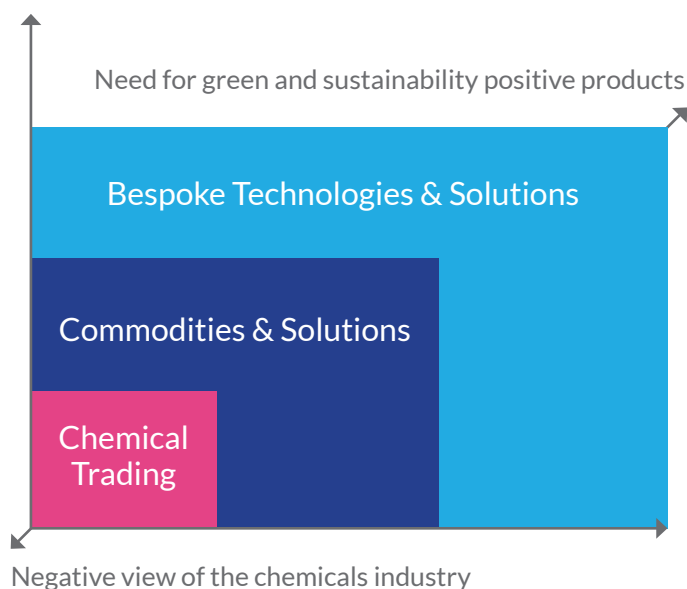

Kevali means “Supreme Knowledge” and that is the nexus of Kevali’s business model.

Kevali decided to enter the chemicals space in order to offer a very different value proposition. The chemicals sector has a number of offerings that are based on a commodities model that does not deliver full value to customers.

Kevali’s proposition moves away from just “another chemical trading company” to one that aims to provide solutions to customers’ everyday challenges and opportunities.

Kevali uses “Supreme Knowledge” to design and offer solutions that offer “Supreme Value”.

Kevali’s business model & value proposition

Profile

Kevali provides customized solutions within the chemicals industry with a focus on Hygiene and Sanitation; Water Treatment and Adhesives. Kevali prides itself in offering solutions versus commodities.

Kevali aims to partner with its clients in offering bespoke solutions that will address customer challenges, needs and growth opportunities. Kevali Chemicals Group has extensive knowledge within the following sectors: brewing and wineries; dairy, food processing; soft drinks; fresh produce, meat and poultry.

Kevali has well-established relationships with critical international technology partners and it is these solid relationships that allow Kevali to hold a strong portfolio of technologies that can offer quality; cost effectiveness and sustainability to customers' operations.

Kevali is a
Black-owned
South African
enterprise
that holds a
level 1 BBBEE
certification

This means Kevali has a good understanding of conducting business in South Africa and can also provide solutions that have the "South African" context in mind.

Key business segments

Water Treatment

- Chemical Supply
- Water Treatment Plant & Facilities Design
- Problem Solving & Process Optimisation
- Turnkey Solutions

Hygiene & Sanitation

- Chemical Supply
- Hygiene Engineering & Design
- Problem Solving & Process Optimisation
- Turnkey Solutions

Adhesives

- Chemical Supply
- Bespoke Solutions
- Process Optimisation
- Problem Solving

Product and solutions offering

We serve Food and Beverage Industry where processing plant and personal hygiene are critical for consumer safety.

We also provide good manufacturing practice and food safety related services to ensure that our customers produce products that are safe and suitable for consumption.

Consumer Care

- Chemical Supply
- Installation and Maintenance
- HACCP and Hygiene Audits
- Problem Solving
- Staff Training

Hygiene and sanitation

Cleaning & Sanitising, CIP and Manual Systems

Alkalies, acids detergents, sanitizers/disinfectants

Manual Cleaning & Sanitising

Comprehensive range of alkali, acid, neutral detergents, sanitizers & disinfectants

Range of Products

Bottle Washing

Formulated alkalies, caustic lye/flakes & additives

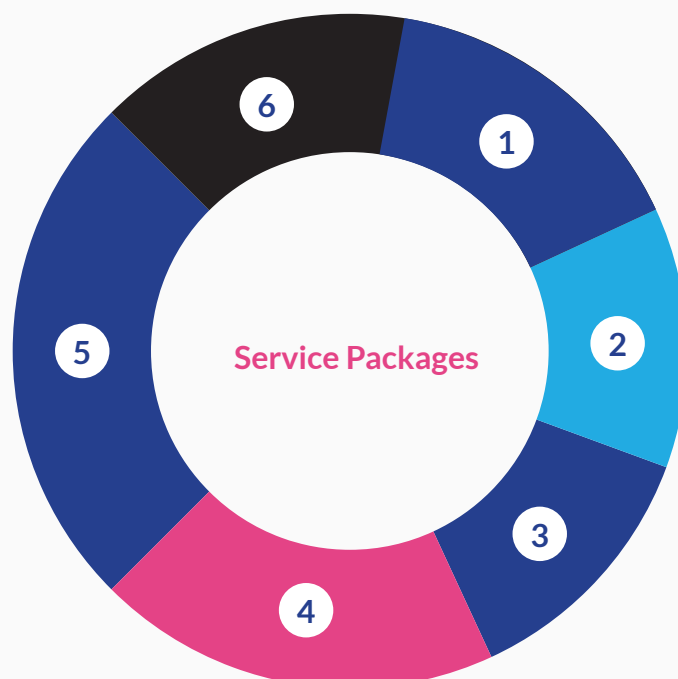

Conveyor Lubrication

Synthetics, natural oil (water free) & natural soap lubricants

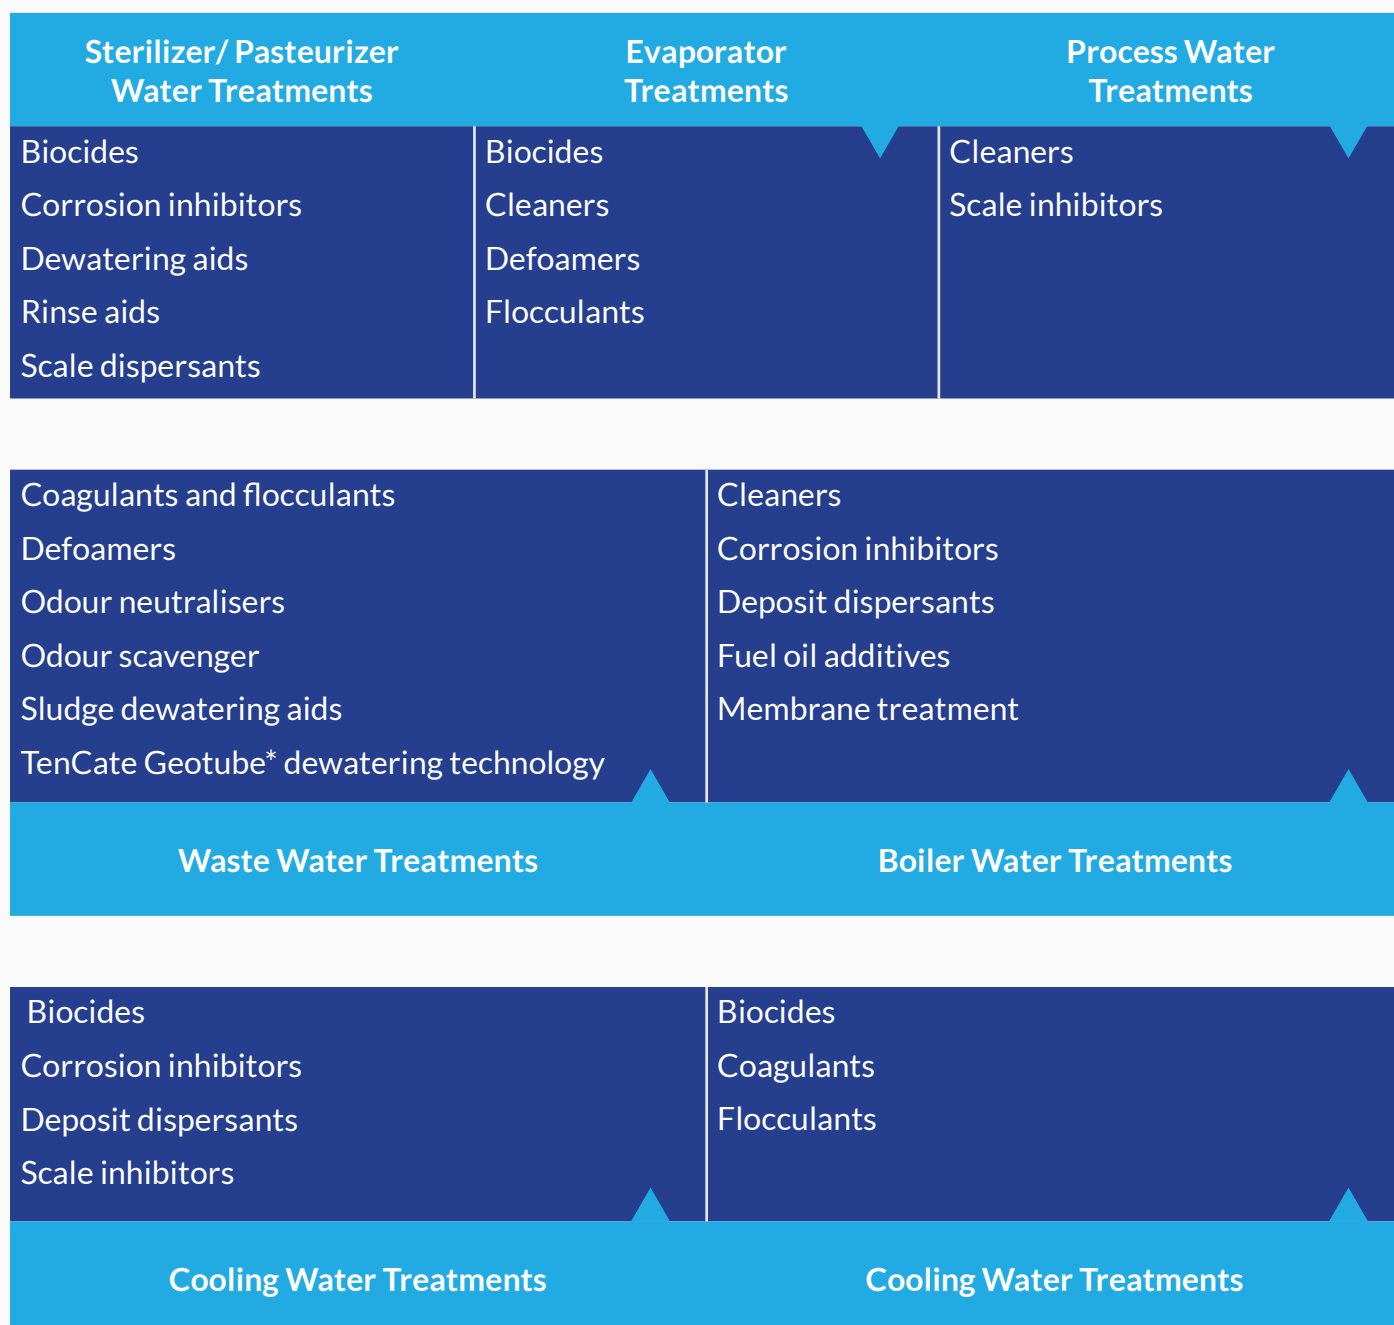

Processing & Environmental Sanitising

Foam, spray & high pressure cleaning & sanitising

1. QA and R&D Support
2. GMP / GHP Hygiene Risk Management
3. Supplier Partnering Programs
4. Specialised Staff Training
5. Hygiene Auditing & Reporting
6. Lean six sigma and DOE based trial designs and analysis

Process and water treatment solutions

Adhesives

Range of Products Labelling Adhesives

Casein based adhesives
Synthetic adhesives

Range of Products Labelling Adhesives

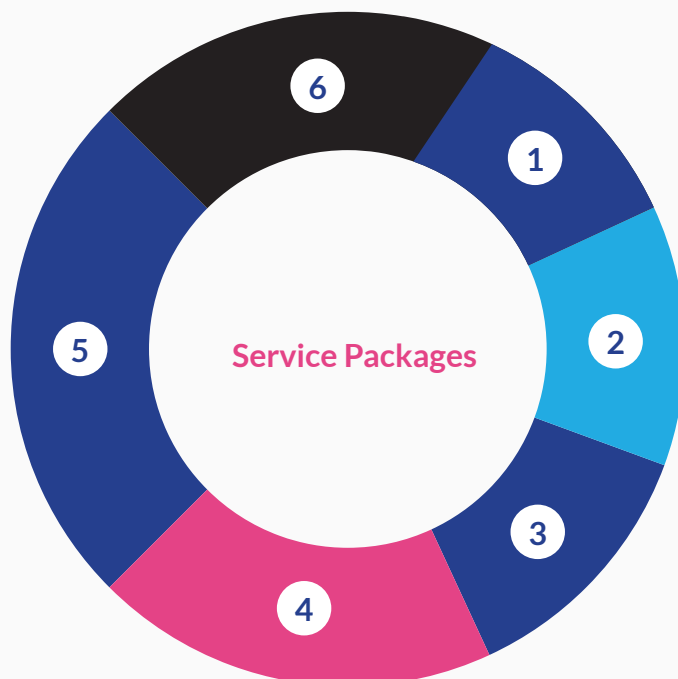

Speciality Adhesives

Wood working
Water based adhesives
for packaging

Hot Melt Adhesives

EVA based hot melts for packaging
Metalocene based hot melts for packaging
Hot melts for labelling

1. Trained Sales Technologies
2. Supplier Partnering Programs
3. Specialised Staff Training
4. Auditing & Reporting
5. QA and R&D Support
6. Lean Six Sigma and DOE

Consumer Care

Fabric Care

Detergents
Rinsers and Bleaches
Dry Cleaning Products

Pest Control

Institutional Hygiene

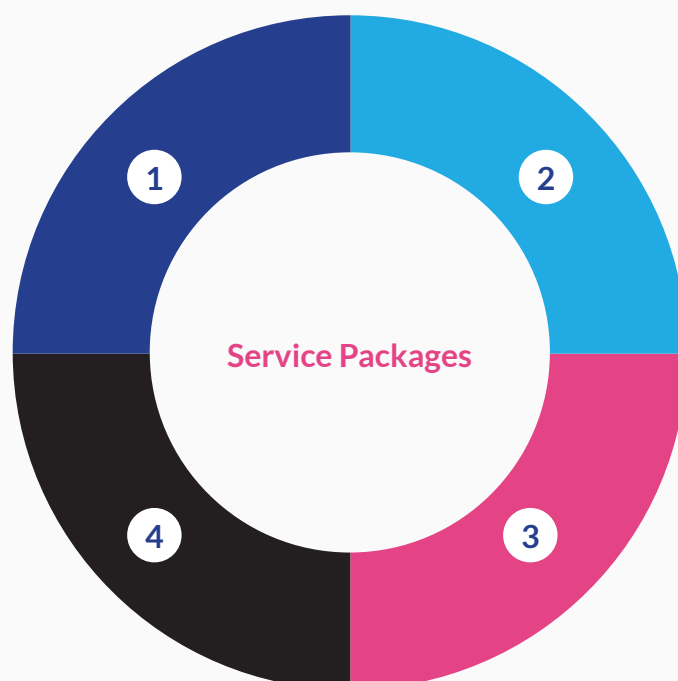

Outdoor and Janitorial
Industrial Applications
House keeping
Personal Care
Automotive

Technical

Cleaning Consumables
Cleaning Tools and Machines
Dispensing System
Installation and Engineering

Range of Products

1. Staff Training
2. HACCP Training
3. Hygiene Auditing & Reporting
4. Site Audits and Solution Proposal

Capabilities to serve the following industries

Hygiene & Sanitation

Beer, Wine, Alcoholic Beverages

CIP and manual systems, process equipment disinfection, environmental cleaning & disinfection/fogging, bottle washing, Filler CIP and foaming, chemical measurement system, conveyor lubrication, biofilm control, pasteurizer treatment, wort boiler descaling/tubes unblocking, drain and odour control.

Dairy

CIP and manual systems, process equipment disinfection, environmental cleaning & disinfection/fogging, Filler CIP and foaming, chemical measurement system, conveyor lubrication, biofilm control, pasteurizer treatment, drain and odour control.

Fresh Produce

Manual systems cleaning, process equipment disinfection, environmental cleaning & disinfection, personal hygiene products, chemical measurement system, drain and odour control, biofilm control.

Red Meat

CIP and manual systems, process equipment disinfection, environmental cleaning & disinfection, Personal hygiene, chemical measurement system, biofilm control, drain and odour control.

Poultry

Broiler farms cleaning, Broiler farms disinfection/fogging, Hatchery cleaning, hatchery disinfection/fogging, process equipment disinfection, personal hygiene products, biosecurity products, drain and odour control.

Water, Juices, Non/Carbonated drinks

CIP and manual systems, process equipment disinfection, environmental cleaning & disinfection/fogging, bottle washing, Filler CIP and foaming, chemical measurement system, conveyor lubrication, biofilm control, pasteurizer treatment, drain and odour control.

Fisheries

CIP and manual systems, process equipment disinfection, environmental cleaning & disinfection, Personal hygiene, chemical measurement system, biofilm control, drain and odour control.

Food Processing

CIP and manual systems, process equipment disinfection, environmental cleaning & disinfection, personal hygiene products, chemical measurement system, drain and odour control, biofilm control.

Water Treatment

Pulp & Paper

Specialist process products ranging from conventional corrosion and deposit inhibitors to biocides and defoamers on to polymers for retention and waste water treatment.

Petrochemical and Refinery

Development of innovative problem solutions, such as Scavengers for mercury removal, emulsion breakers for process water systems, effective defoamers for stripper columns, Safe and efficient cleaning and degassing additives. In refinery side also Patented ACF technology for online removal and prevention of ammonium salts, Fouling inhibitors, Fuel additives, Cleaning and degassing additives, Technologies for Heat Stable Salt (HSS) control.

Automotive

Cooling Water, Boiler Water, Waste Water & Paint Booth Treatment

Mining

Cooling Tower, Boiler Water, Waste Water Treatment & Reverse Osmosis.

Power Generation

Cooling Water, Boiler Water, Waste Water, Reverse Osmosis.

Municipalities

Portable Water & Waste Water Treatment.

Metal and Steel

Different flocculants and emulsion breakers as well as specific products for removal of heavy metals, water recycling, cooling water, boiler water, Waste Water, Reverse Osmosis technologies.

Food and Beverage

Cooling Water, Boiler Water, Waste Water, Reverse Osmosis & Pasteurizer Water Treatment.

Pharmaceuticals

Cooling Water, Boiler Water, Waste Water, Reverse Osmosis.

General Manufacturing

Cooling Water, Boiler Water, Waste Water, Reverse Osmosis.

Consumer Care

Hospitality

Hygiene products and solutions to ensure a clean and safe environment. Staff training and Audits that ensure protection of people but also create an environment for optimum guest satisfaction.

Healthcare

Solutions to provide sanitation and disinfection for eradication of infections and maintenance of clean and sterile environments where in high quality patient care can be given.

Textiles

On premise and commercial laundry chemicals that are effective at cleaning and also offer optimum spend management through high quality products and low energy solutions.

Buildings and Facilities

Chemical supply for effective cleaning of facilities with solutions engineered to offer productivity, quality and sustainability. Dispensing solutions that ensure minimum product wastage and compliment facility aesthetics.

Food Services

Supply of a range of products for surface and wash ware care. Staff training to ensure food safety and adherence to standards such as HACCP. Provision of green solutions for reduction in electricity and water usage.
